

REPUBLIC OF BULGARIA

NATIONAL MARKET SURVEILLANCE PROGRAMME FOR 2011 *

* Revised version in accordance with legislative amendments.

Introduction

To ensure the effective functioning of the Single European market and executing its obligations to guarantee the free movement of goods, since 2010 Bulgaria applies the requirements of Regulation (EC) № 765/2008 of the European Parliament and the Council setting out the requirements for accreditation and market surveillance relating to the marketing of products and repealing Regulation (EC) № 339/33. The National market surveillance programme for 2011 is prepared on the basis of the Regulation and in accordance with the provision of article 18 (5) thereof. The National programme consists of eight sectoral programmes. Their realization meets the set up general objectives.

I. General objectives

To ensure unhindered and effective functioning of the internal market, Bulgaria has established, in the field of free movement of goods, a legislative framework and an infrastructure which is necessary for its implementation. The process of development of the technical legislation in the country is carried out in accordance with some basic principles:

- Timeliness – The harmonized legal acts are transposed into the national legislation in the shortest time in order to guarantee a period which will be sufficient for the business to be in compliance;
- Information – The opinion of the business is sought during the participation in the development of the European technical legislation in order to form national positions; All proposals for legal acts are publicly available for opinions and comments; Competent institutions publish actual information concerning the new requirements and forthcoming amendments;
- Accuracy – The most precise and accurate reproduction of the requirements of the harmonized legislation is kept (is followed) in the process of transposition of the European legislation.

The general and sectoral legislation in the field of free movement of goods as well as the principles of the old and new approach are transposed into Bulgarian legislation by various legal acts – ministerial decrees and regulations. These acts lay down requirements for producers, importers, distributors and retailers. The observation of the requirements ensures production and placing on the market of safe and complying with the harmonized requirements products.

In Bulgaria there is a system of authorities carrying out surveillance activities in order to guarantee strict compliance with the legally set up requirements. According to Regulation (EC) № 765/2008 these authorities are called “market surveillance authorities”. They apply control and surveillance procedures and methods (prevention, inspection of documents, physical inspections, withdrawal, etc.) in order to place on the market only safe and complying with the legal requirements products. Within the frameworks of the prevention activities, the market surveillance authorities pursue an active policy to increase the information of the business and public. Within the frameworks of the initiatives to increase the information, the requirements of the European legislative framework concerning the safety of goods and procedures for conformity assessment are subject to explanation (clarification). Within the frameworks of the prevention activities, the market surveillance authorities provide information to their web sites and develop columns “questions and answers”, „advises for the consumer”, etc.; organize explanatory campaigns; participate in various forums and seminars; prepare and distribute printed materials. Within the frameworks of their information activities, the authorities provide data concerning dangerous products determined as such in consequence of their surveillance activity or for which they have received data in RAPEX system or as a result from the cooperation with competent authorities of other member states. Specific surveillance activities are also carried out in case of signals and complaints from consumers and competitive economic operators.

When planning and executing their surveillance activities, the authorities take into account great number of elements of the risk assessment: danger degree, particular consumer group, results from previous inspections, seasonal increase of the consumer interest for some goods, etc. The latter requires

organization of specialized campaigns because the seasonal supply and demand is specific for some goods (for example Christmas decoration).

The authorities are legally authorized to impose sanctions for noncompliance with the legal requirements, including imposing measures as prohibition or limitation of the realization of the product on the market.

Most of the surveillance activities are carried out on site of retailers and wholesale dealers in view of the significant part of the import of the products compared to the part of the product produced in the country. In Bulgaria there is established infrastructure suitable to carry out testing of most of the products which are subject to surveillance. In case of lack of capacity for testing specific parameters, the competent authorities use the services of accredited laboratories of other member states.

The administrative capacity and financial insurance of the surveillance activities are limited within the frameworks of the number of the specialized units in the relevant administrative structures and their annual budgets.

II. Organization at national level

Market surveillance activities in Bulgaria are performed by a system of competent authorities which functions are established in different sectoral laws. The surveillance functions are assigned to different institutions by different legal acts depending on the particulars of the product group. Bulgaria is among the member states which use the approach for organization of the market surveillance mainly at sectoral level. The eight sectoral market surveillance programmes for 2011 which will be realized by the competent authorities are presented as Annex to the present document. Within the meaning of Regulation (EC) № 765/2008 market surveillance authorities are the following institutions: Commission for consumer protection, State agency for metrological and technical surveillance, Directorate for National Construction Supervision, Regional inspectorates for public health protection and control, Bulgarian food safety agency, Pharmaceutical agency, Technical control inspectorate and Regional inspectorates of environment and waters. The system of market surveillance authorities functions by way of distribution of the competences among five ministries, namely Ministry of economy, energy and tourism, Ministry of health, Ministry of agriculture and foods, Ministry of environment and water and Ministry of regional development and public works.

A Council for coordination and exchange of information between competent authorities within the meaning of Regulation (EC) № 765/2008 has been established by a governmental act – Decree of Council of ministers № 180/2005. Since 1 August 2011 the deputy ministers of economy, energy and tourism, assigned by their minister, are respectively chairman and vice-chairman of the Council. The organizational and technical service of the Council's activity is realized by a Directorate within the Ministry of economy, energy and tourism.

The Council for coordination consists of representatives of Ministry of environment and water, Ministry of health, Pharmaceutical agency, Commission for consumer protection, Bulgarian food safety agency, Directorate for National Construction Supervision, National Customs Agency, State agency for metrological and technical surveillance, Executive Agency on Vine and Wine, Executive Agency Fisheries and Aquacultures, Executive Agency Plant Variety Testing, Approbation and Seed Control, General Directorate Criminal Police, Technical Control Inspectorate to the Minister of Agriculture and Food. These institutions within the arias of their competences have control and surveillance functions for the products covered by Community harmonization legislation. They perform joint inspections, too. Institutions performing surveillance of products excluded from the scope of the Regulation (e.g. foodstuffs, medicinal products, etc.) also participate in the Council.

The Council for coordination is in practice a coordination point within the meaning of the Regulation and has a key role for ensuring the effective implementation of Chapter III of Regulation (EC) № 765/2008.

The Commission for consumer protection is the specialized state authority in Bulgaria dealing with the problems of the consumers' protection. The Commission is also one of the main internal market surveillance authorities. Among the main directions of activities are: surveillance of the general products

and services safety at the Bulgarian market, protection of the main consumer rights, trade practices and methods of sale, etc. In addition the Commission for consumer protection is the Bulgarian contact point for RAPEX system.

The State agency for metrological and technical surveillance (SAMTS) carries out market surveillance activities for products covered by the New approach directives with the following exceptions:

- construction products, where the market surveillance activities are performed by SAMTS in collaboration with Directorate for National Construction Supervision within the Ministry of regional development and public works; and
- medical devices, where the market surveillance activities are assigned to the Pharmaceutical agency to the Minister of health.

Further the State Agency for Metrological and Technical Surveillance carries out market surveillance for products in the scopes of Directive 2009/125/EC on ecodesign requirements for energy-related products, Directive 2002/95/EC on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS) and Directive 2002/96/EC on waste electrical and electronic equipment (WEEE).

Directive 93/15/EEC	Explosives for civil uses (CIVEX)	Explosives for civil uses	Reactive	Complaints	Visual inspections/ Inspection of documents	High
Directive 99/36/EC	Transportable pressure equipment	Transportable cylinders for liquefied petroleum gas LPG	Proactive/ On the national territory	Complaints/ Re-inspection	Visual inspections/ Inspection of documents	High
Directive 2009/125/EC Regulation (EC) № 643/2009	Electrical equipment	Domestic refrigerating appliances (ecodesign)	Proactive	Lack of knowledge	Monitoring	Medium
Directive 2009/125/EC Regulation (EC) № 1275/2008	Electrical equipment	Washing machines (ecodesign)	Proactive	Lack of knowledge	Monitoring	Medium
Directive 95/16/EC	Lifts	Lifts for residential	Proactive/ On the	Re-inspection/	Visual inspection/	High

		and public accessible building	national territory/ Reactive/ Border control	Complaints	Inspection of documents	
Directive 2009/23/EC	Measuring instruments	Non-automatic weighing instruments	Proactive/ Reactive/ Border control	Complaints/ Re-inspection/ Risk assessment	Inspection of documents/ Visual inspection/ Target group – installation site	High
Directive 2004/22/EC	Measuring instruments	Measuring systems for liquids other than water	Proactive/ Reactive/ Border control	Complaints/ Re-inspection / Risk assessment	Inspection of documents/ Visual inspection/ Target group – installation site	High
		Heat meters	Proactive/ Reactive	Complaints/ Re-inspection	Inspection of documents/ Visual inspection	Medium
		Water meters, Active electrical energy meters, Gas meters AWI, Taximeters, Material measures, Exhaust gas analysers	Reactive	Complaints	Inspection of documents/ Visual inspection	Low
Directive 2009/30/EC (Directive 98/70/EC); Directive 2009/28/EC; Directive 2003/17/EC; Directive 1999/32/EC (Directive 2005/33/EC)	Liquid fuels	Biofuels, Petrol, Diesel fuel	Reactive/ Proactive	Complaints	Product testing	High
Directive 2007/45/EC; Directive 1976/211/EEC	Prepackages	Prepackages	Proactive/ Reactive	Complaints/ Re-inspection/ Risk assessment	Visual inspection/ Control of net quantities/ Inspection of documents concerning lot control	Medium
Directive	Electrical equipment	Compact	Proactive	Lack of knowledge	Monitoring	Medium

2009/125/EC Regulation (EC) № 244/2009		luminescent lamps (ecodesign)				
Directive 2006/95/EC	Electrical equipment	Electrical blankets, pillows and grills	Proactive/ On the national territory	Complaints/ Lack of knowledge	Visual inspection/ Inspection of documents/ Testing	High
		Epilators, Shavers and hair clippers	Proactive/ On the national territory	Lack of knowledge	Visual inspection/ Inspection of documents/ Testing	High
Directive 2007/23/EC	Pyrotechnic articles	Pyrotechnic articles Category 1, 2 and 3	Proactive/ Reactive/ On the national territory	Lack of knowledge	Visual inspections/ Inspection of documents	High
Directive 71/317/EEC, Directive 74/148/EEC	Measuring instruments	medium and above medium accuracy weights	Reactive	Complaints	Visual inspection	Low
Directive 75/33/EEC	Measuring instruments	cold water meters intended for use of non-treated waters	Reactive	Complaints	Visual inspection	Low
Directive 76/765/EEC	Measuring instruments	alcohol meters and alcohol hydrometers	Reactive	Complaints	Visual inspection	Low
Directive 86/217/EEC	Measuring instruments	tyre pressure gauges for motor vehicles	Reactive/ Proactive	Complaints/ Re-inspection	Visual inspection	Low
